# wePresent

SharePod

The SharePod is a unique pairing solution to wirelessly connect any HDMI source into a wePresent environment.

Pair the SharePod with a WiPG-2000, enabling seamless collaboration in meetings and classrooms.

Wireless Mirroring for HDMI Sources
Connect an HDMI source to the SharePod for full audio/video mirroring to any display or projector, without software or other configuration required.

Easy Guest Connection
Simple one-touch connection for guests in any wePresent environment.

Supports wePresent Features
Utilize the advance features on the wePresent device such as the 4-to-1 projection, Annotation, WebSlides and Conference Control.
