## Artistic Immersion, Overwhelming Attractiveness 0.9mm Even Bezel Video Wall 55VH7B

With its borderless design, the VH7B series offers maximum immersion for video walls. Its quad-core SoC plays various types of content without the need of an extra media player due to its efficient management tools. The VH7B effectively raises customer awareness, particularly in areas with heavy foot traffic such as museums, galleries and large retail stores.

### Key Features

#### Borderless Design

#### Narrowest Bezel

Borderless design with its 0.9mm even panel bezel\* enables immersive and seamless viewing experiences on assembled video wall screens.

\*Panel Bezel: The black matrix section where an image is not displayed on the front panel.

#### Smart Platform

#### Built-in SoC\* and Synced Playback

The optimized built-in quad-core SoC in the VH7B can play various content formats and eliminates the need for an external media player. Using its built-in SoC, each display plays its video tile without lag for synchronized content playback.

\*System-on-Chip

- CPU**  
1.2GHz Quad Core CPU
- Memory**  
2.5GB double data 3 (DDR3) 32bit memory
- GPU**  
550MHz video processor with full codec (WMV, MP4, HEVC, VP9, and H.264 capabilities)
- Internal Memory**  
A storage of 8GB (4GB is occupied by system)

#### webOS 2.0

The webOS 2.0 platform provides easy and convenient tools to create contents. LG's SDK\* and technical supports make content development and management easier.

## Key Features

### Superior Picture Quality

#### Clear Viewing Angle

The VH7B ensures clear picture quality even when installed in stacks of more than four. This is very favourable for the quantity of video walls installed in large spaces.

\*The angle from the center of the screen to have 50% of the initial luminance.

### Uniform Brightness

LG's LED backlight technology guarantees high uniformity in brightness to ensure a clear picture. On other screens, certain spots may appear darker than others, but the new VH7B generates high visibility and a consistent brightness across the whole screen.

### Video Wall Image Creation

Through Video Wall Image Creation (VIC) technology, color and brightness differences are compensated in circuit part with an algorithm to make the panels into a same characteristic so that each video wall maintains the consistent white balance.

### Image Gap Reduction

The VH7B includes an image improvement algorithm that can adjust to objects located in the boundary of bezel for a seamless viewing experience.

\* This function is applied to models produced in February, 2016.

## Enhanced Content Management

### LAN Daisy Chain Performance

A LAN daisy chain allows you to execute commands to control and monitor the screens and even update their firmware.

## Convenient Options

### Guide Bracket/Classified Port

A guide bracket is an attachment that ensures the video wall remains flat. The classified in/out port prevents errors when connecting to a daisy chain.

### Control Buttons

With 8 control buttons, it's easy to operate various functions of the VH7B, such as controlling the OSD (On Screen Display) and changing the input source.
