

*Tablet-sized commercial displays for retail shelf edge and point of sale applications*

## Power Over Ethernet (PoE)

Power your screen by using the power cable provided or supply the power over an Ethernet cable. This minimises the number of cables needed for installation as you can supply power and internet connectivity to the screen simultaneously.

## Stylish Enclosure

The modern enclosure is crafted from moulded polymer for ultimate aesthetics. With it's pure black finish and rounded corners the screen can fit seamlessly in many environments such as corporate offices or retail spaces.

### Plug and Play

Plug and Play is the most straightforward way to upload content to the screen. Simply load images and videos onto a USB stick, insert into the display, wait for your content to copy over and then remove. Your images and videos will now play in a continuous loop.

### 24/7 Commercial Use

These displays use a commercial grade LCD panel and LED backlight. They have the ability to be in constant use 24/7 for over 70,000 hours and have no external buttons or controls to avoid tampering.

### No Integrated Battery

Unlike domestic tablets these displays do not have built-in batteries and therefore last considerably longer. They are designed to be used constantly 24/7 in public spaces and can be powered directly from the mains or over PoE.

### VESA Mounting Holes

Unlike domestic tablets these displays have an integrated and secure screw based mounting solution on the rear for easy wall or stand installation.

### Integrated Camera

If the software you are using requires a camera you can use the screen's integrated front facing 2 megapixel camera.

### Multi Coloured LED Frame

The LED edges either side of the display can be red, green, blue, magenta, cyan, yellow and white. They can also be disabled completely if preferred.

Available in 7  
Colours

### Power Timer

The eco-friendly power timer allows you to assign daily or weekly on and off times for your screen meaning that it is only in use when it needs to be; improving your environmental efficiency.

### Optional NFC Integration

For projects that require Near Field Communication an internal module can be implemented for even more interactivity and engagement.
